With Independent Audit Limited - Thinking Board® and Hawkamah

There is a well-defined recognition of the relationship between board evaluation and performance. Boards that go through a regular comprehensive and effective board evaluation achieve clarity and transparency in areas such as leadership, culture, accountability, decision making and communications which, in return, leads to a strong governance practices within companies. Therefore, board evaluation became a mandatory requirement in many countries in the MENA region such as Bahrain, Oman, Saudi Arabia, and Kuwait.

At Hawkamah, we perceive board evaluation as an exercise to help boards improve their performance, dynamics, and operations. The challenge always remains the tight schedule of boards and the time availability of board members to go through interviews and presentations. Therefore, Hawkamah, in cooperation with Independent Audit Limited (IAL), is offering a questionnaire-only based board evaluation that saves directors' time and companies' money without reducing the quality of the output.

The questionnaire designed by IAL, Thinking Board® and administered by Hawkamah is designed to be realistic and focuses on the engagement of the respondents, who might be board members, top executives, and others who are engaging with boards. The process includes a customized questionnaire using the online board assessment tool, which saves valuable time, makes it easy to distribute questionnaires widely and, critically, ensures responses are kept secure. We then provide a brief report, providing a set of visual and clear results, helping Boards and Company Secretaries to rapidly draw out the main messages into a clear narrative to set up a constructive discussion at the Board.
